11. Security Profile — Summary Stats

```
Working configs              : 1451
Proxy-detected by ip-api.com : 814  (56.1%)
IPv6-capable exits           : 393  (27.1%)
IPv6 leak (country mismatch) : 57  (14.5% of IPv6-capable)

dns_resolver_ip : empty — SOCKS5 routes DNS server-side; edns.ip-api.com requires
                  EDNS client subnet, which most VPN proxy servers do not send.
x_forwarded_for : empty — SOCKS5 is layer-4 and does not modify HTTP headers.
```
